

Lovies

The sense of smell is the most advanced sense that babies have at birth. In fact research has shown that even before birth, fetuses can smell. Furthermore, at just 3 days old infants can tell the difference between the scent of his/her mother's breast milk and that of another person's. AMAZING isn't it!! To baby, mommy always smells like roses, and that's comforting and soothing.

1.) To make Lovies you will need:

100% Flannel Cotton (Pick baby fabric suitable for male or female infants)

Please avoid gender specific fabrics.

Small amount of fiberfill to make ball.

Ribbon or yarn.

2.) Cut 2 - 12"squares of fabric. Hem all four sides. Place fiberfill ball in center and secure with tie. Place ribbon over tie, under ball.

3.) Before you deliver Lovies:

Wash with hypoallergenic detergent such as Dreft detergent.

Place in a resealable sandwich bag.

Add message inside zip lock bag:
